

Horoscope Matching & Marriage Compatibility

Horoscope matching is done in Hindus when two people are considering marriage and want to determine their compatibility. The report shows the vedic birth chart of both the boy and girl and the matching report as per ancient Vedic principles and determines temperament compatibility, mutual love, strength of the marital bond, financial prosperity post marriage, progeny, compatibility amongst other things .

Vedic Astrology has a method of providing a fairly good indication of compatibility based on nakshatras (Lunar Constellations) of prospective husband and wife. It assigns points (guna) for factors that influence marriage. Apart from determining the number of Gunas that match in the two horoscopes, there are other factors that should be taken into consideration: longevity, health, wealth, children and overlapping Vimshottari dashes.

Horoscope Matching or Kundli matching is very deep and intensely rooted in Hindu society. Before entering in to marriage relationship an astrologer may be referred to for his analysis of the horoscopes (match making) of boy and the girl. It is done to ensure a harmonious, balanced and healthy marriage relationship.

Matching of horoscopes or marriage compatibility, is hence, even more basic than matching the blood group. A medically mismatched couple risk their health & progeny, but an astrologically mismatched couple may put at stake, their health, wealth, happiness, success, peace of mind, their future growth & prosperity - everything that makes life worthwhile.

According to Astrology horoscope matching is much more than just gun Milan and Manglik Dosh. There are five major aspects or indicators, which are relevant, when it comes to matching of two horoscopes for the purpose of marriage.

Longevity: First of all longevity of the boy and girl are checked. If there is a noticeable difference, there may be no further need to match the horoscopes.

Mental makeup or nature: Two horoscopes are matched for their mental faculty so as to check whether their mental wavelength matches or not. If boy is of hot temper and the girl is also of the same temper, this could result in strained relations and possible separation even at later stages of married life.

Progeny or ability to give birth to children: The horoscopes of boy and girl may indicate the couple to have at least one child.

Health: Both boy and girl to have a good health and should not contact any fatal or crippling disease or accident may be another indicator.

Separative Tendencies: The horoscopes of boy and girl should not show any tendencies for very long separation between them or show any signs of divorce between them.

The Vedas state that after marriage the husband and wife are treated as one. The destiny of one affects the destiny of the other. This makes it extremely important to study the possible fortunes and misfortunes resulting as the result of such a union. To ensure their health, wealth, happiness, success, peace of mind, their future growth & prosperity and quality of life, horoscope matching is imperative for those who strongly believe in it.
