

Overseas Property Investments

With the UK Property market starting to fall, Asian investors are looking to invest into overseas property markets looking for a handsome return or simply purchase it as a second or retirement home.

In Europe, **Cyprus** has been growing at a rapid rate year on year. Cyprus is the third largest island in the Mediterranean and is also referred to as the paradise in the Mediterranean. It is an island of immense beauty with sun kissed beaches, tranquil countryside and a leisurely lifestyle. Cyprus has proved to be an increasingly popular place for holiday and retirement homes by foreigners. There are an estimated 60,000 British homeowners on the island enjoying all the benefits that Cyprus has to offer.

Further a field, places like **Dubai and India** are expanding at a rapid rate also. The property and real estate market in Dubai, UAE is a rapidly expanding business. Investors can expect almost a 30% or more return on any property. Dubai is one of the few Arabian states open to the West in terms of culture and social integration and secure in terms of political and economic environments. The Dubai property market is growing and anyone who invests in the real estate of Dubai will see a rapid turnover in their investment.

Dubai UAE is creating a real estate and property boom that will tickle the fantasy of most people. It is creating regions within its borders that are representative of the world. Whether you want to buy, sell or invest in the real estate of Dubai the return rate is excellent.

The Indian economy is on the other hand also booming and has been showing a significant growth year on year. This recent boom in the general economic climate has its natural impact on other sectors such as property.

The property market has shown an exponential growth and this trend continues without abating. Prices have been increasing and the investors from around the globe have been keen to invest there especially with relatively lower entry levels. India being a huge country and most regions being encouraged to develop has attracted investors even in more remote regions mainly by Non Resident Indians. Other overseas investors are investing in mainly places like **Goa** for retirement and holiday homes.

Paul Overseas Properties is a UK based company specialising in properties overseas especially in Cyprus, Dubai and India.

Paul Overseas Properties has been set up specifically to provide services in relation to overseas properties and cater for the needs of the speculative investor or someone who just wants to have a second home be it for holiday use or a more permanent residence Mr Naveen Paul who is a director of the company emphasised there are many players in the market these days so one has to be very careful in the selection process. His company provides a very personal service, different from others with full backup and after sales service. Some of the Services are listed below:

Services

- Assess and identify the customer needs and requirements (investment, holiday home, retirement home, etc.) thereafter with our expertise and knowledge search for a suitable property.
